

Hydrogen: CFTI Key Successes in the 117th Congress

Key recommendations the Carbon Free Technology Initiative advocated for and received:

- \$8 billion to support integrated demonstrations on various hydrogen use cases through Regional Clean Hydrogen Hubs.
- \$1 billion for a Clean Hydrogen Electrolysis Program to reduce costs of hydrogen produced from clean electricity.
- \$500 million for Clean Hydrogen Manufacturing and Recycling Initiatives to support equipment manufacturing and strong domestic supply chains.
- Establishment of hydrogen production tax credit and investment tax credit under Inflation Reduction Act.
- \$225 million in appropriations for the U.S. Department of Energy to maintain a diverse program that focuses on early-, mid-, and late-stage research and development and technology acceleration.
